Freelance Moving Service

# GetDolt

Freelance Moving Service

The GetDolt platform is the first internet portal worldwide that covers all spheres of services connected with moving. Our service is developed as an intermediate between a Customer and a Service Provider.

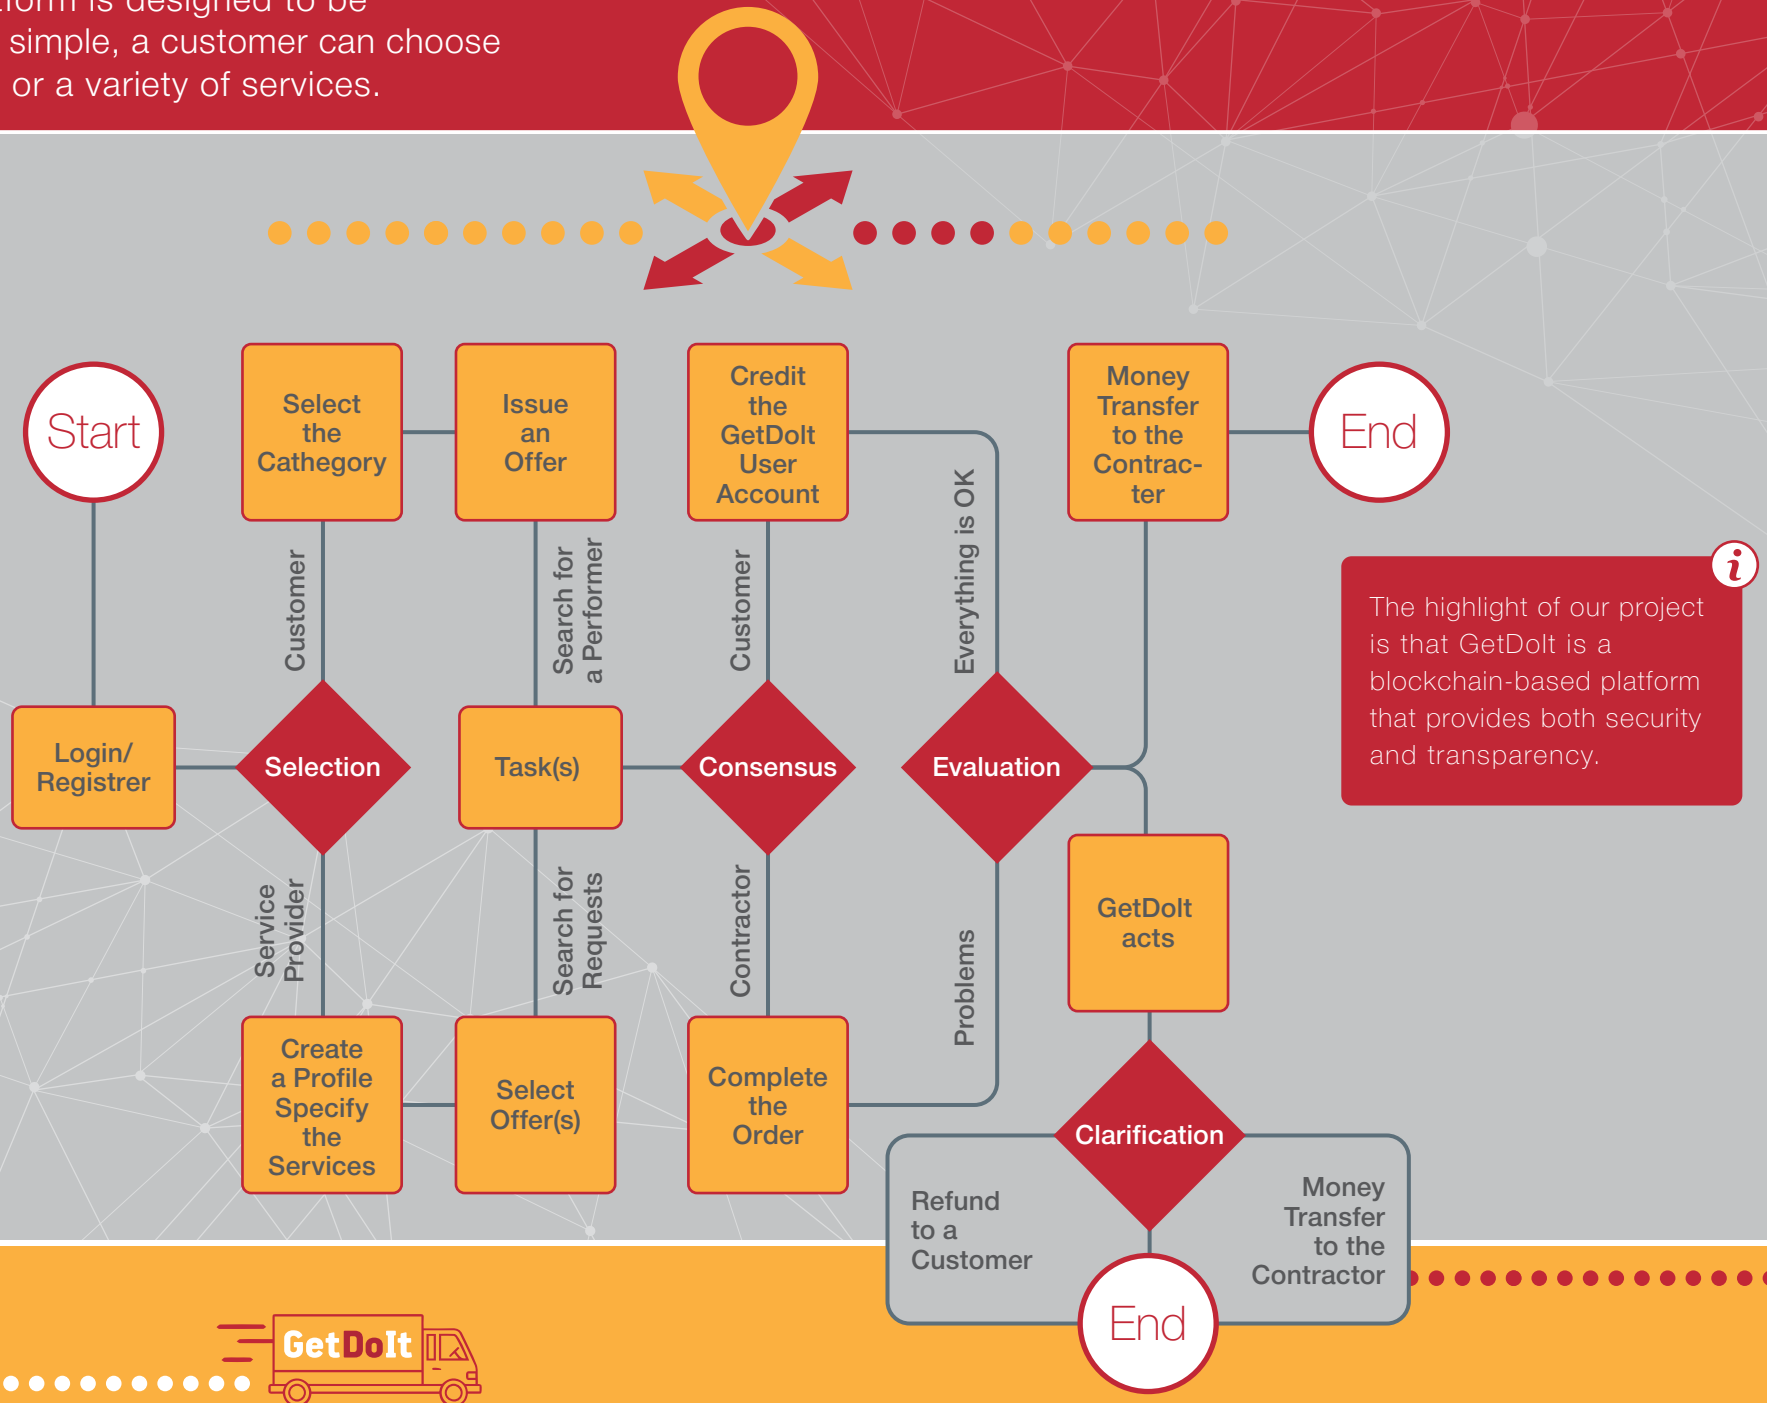

The GetDolt platform functions as a mediator between a Customer who needs definite services and a Contractor who provides them.

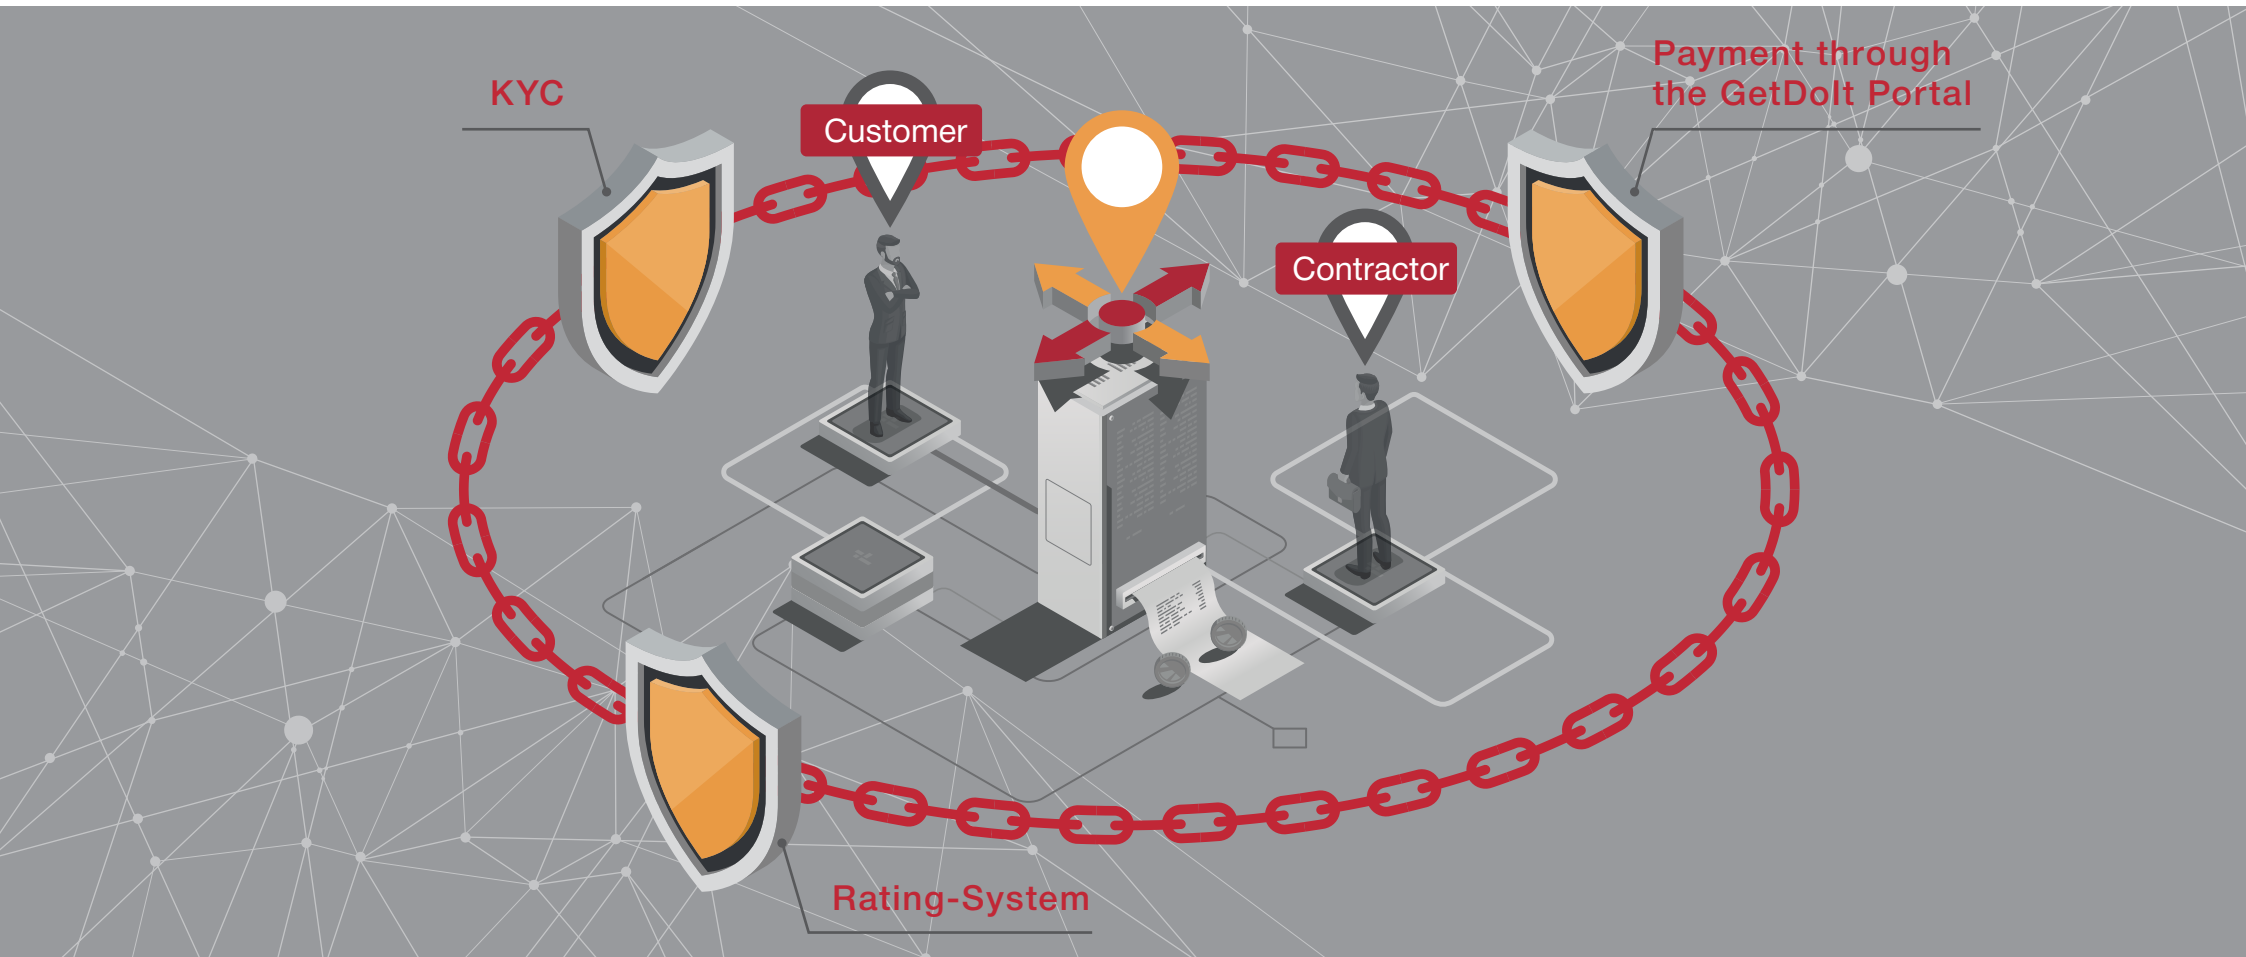

Our portal covers all spheres connected with moving services: transportation and logistics, assembling of furniture and household appliances, renovation of apartments and houses, repair and maintenance.

The GetDolt platform is designed to be user-friendly and simple, a customer can choose between moving or a variety of services.

# GetDoIt

Freelance Moving Service

Security  
measures:

- ①. KYC – «know your customer»;
- ②. Reviews and mutual rating;
- ③. Payment only via the GetDoIt portal;
- ④. Implementation of the interrelation between a customer and a contractor via Blockchain.

# Advantages of the GetDolt platform

## Problem

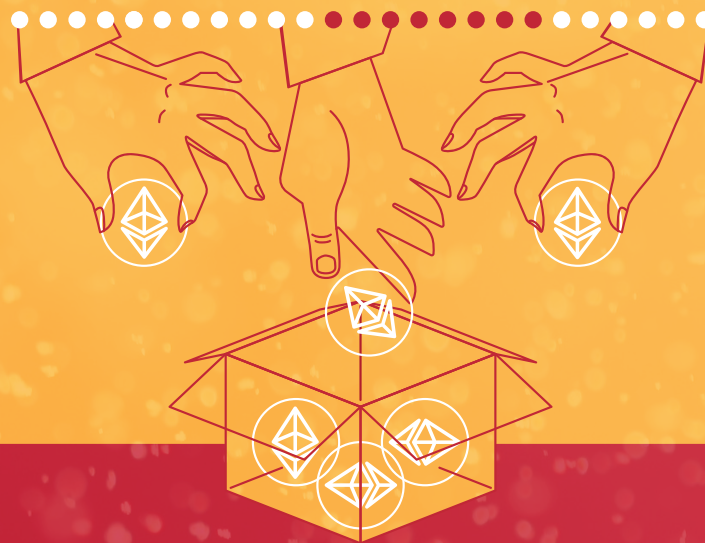

- Clients have trouble finding reliable and qualified service providers
- Customers have often to deal with fake service providers and fraud
- A Customer needs to search and compare reviews to each service provider separately, on different portals, in case the reviews exist
- A Client has to search long to find moving companies, workers, constructors, and other service providers
- The price range is enormous: a Customer often chooses a way too expensive service, having not found a better deal
- The Service Providers, both freelancers and companies, must wait for the customers to find and contact them

## Solution

- The quality of service is controlled by the GetDolt platform via smart contracts. Rating-system and reviews of former Customers also help to keep the quality level high
- A blockchain certification system verifies and validates both Service Providers and Customers. Customer credits the balance, but the payment to the service provider is performed only after the work has been done
- Our rating-system and clients' reviews allow a Customer to find the proper Contractor easily
- Our service covers all spheres connected with movement and handicraft
- The GetDolt service allows a client to select the most suitable contractor, according to one's needs, preferences, and budget
- Our portal allows an easy and secure connection between a customer and a contractor

# Our tokens – the GET

The GET tokens are sold for Ethereum coins, ETH, as well as other popular and reliable cryptocurrencies like Bitcoin, Bitcoin Cash, Litecoin etc., according to the live exchange rate to dollar. The only requirements for buying tokens are to undergo the KYC procedure and to possess an Ethereum wallet that supports the ERC20 protocol. After the end of the sales period, the distribution of the GET tokens will take place.

Private Presale  
1 Juny - 30 September

**Token price:**

€0.01

**Total bonus:**

# Token Sale

## 70% of the tokens will be distributed among ICO participants

The maximal total GET token supply is set at 252 million GET: 100 million GET can be emitted during the private presale and 152 million GET during the crowd sale.

## 10% will be allocated for Advisors, Bounty, and Referral System

The terms and conditions of Bounty Campaign and Referral System are outlined in the White Paper. The total token supply for the Bounty Campaign is set at 1 million GET

## 10% of the tokens will be generated for the Team

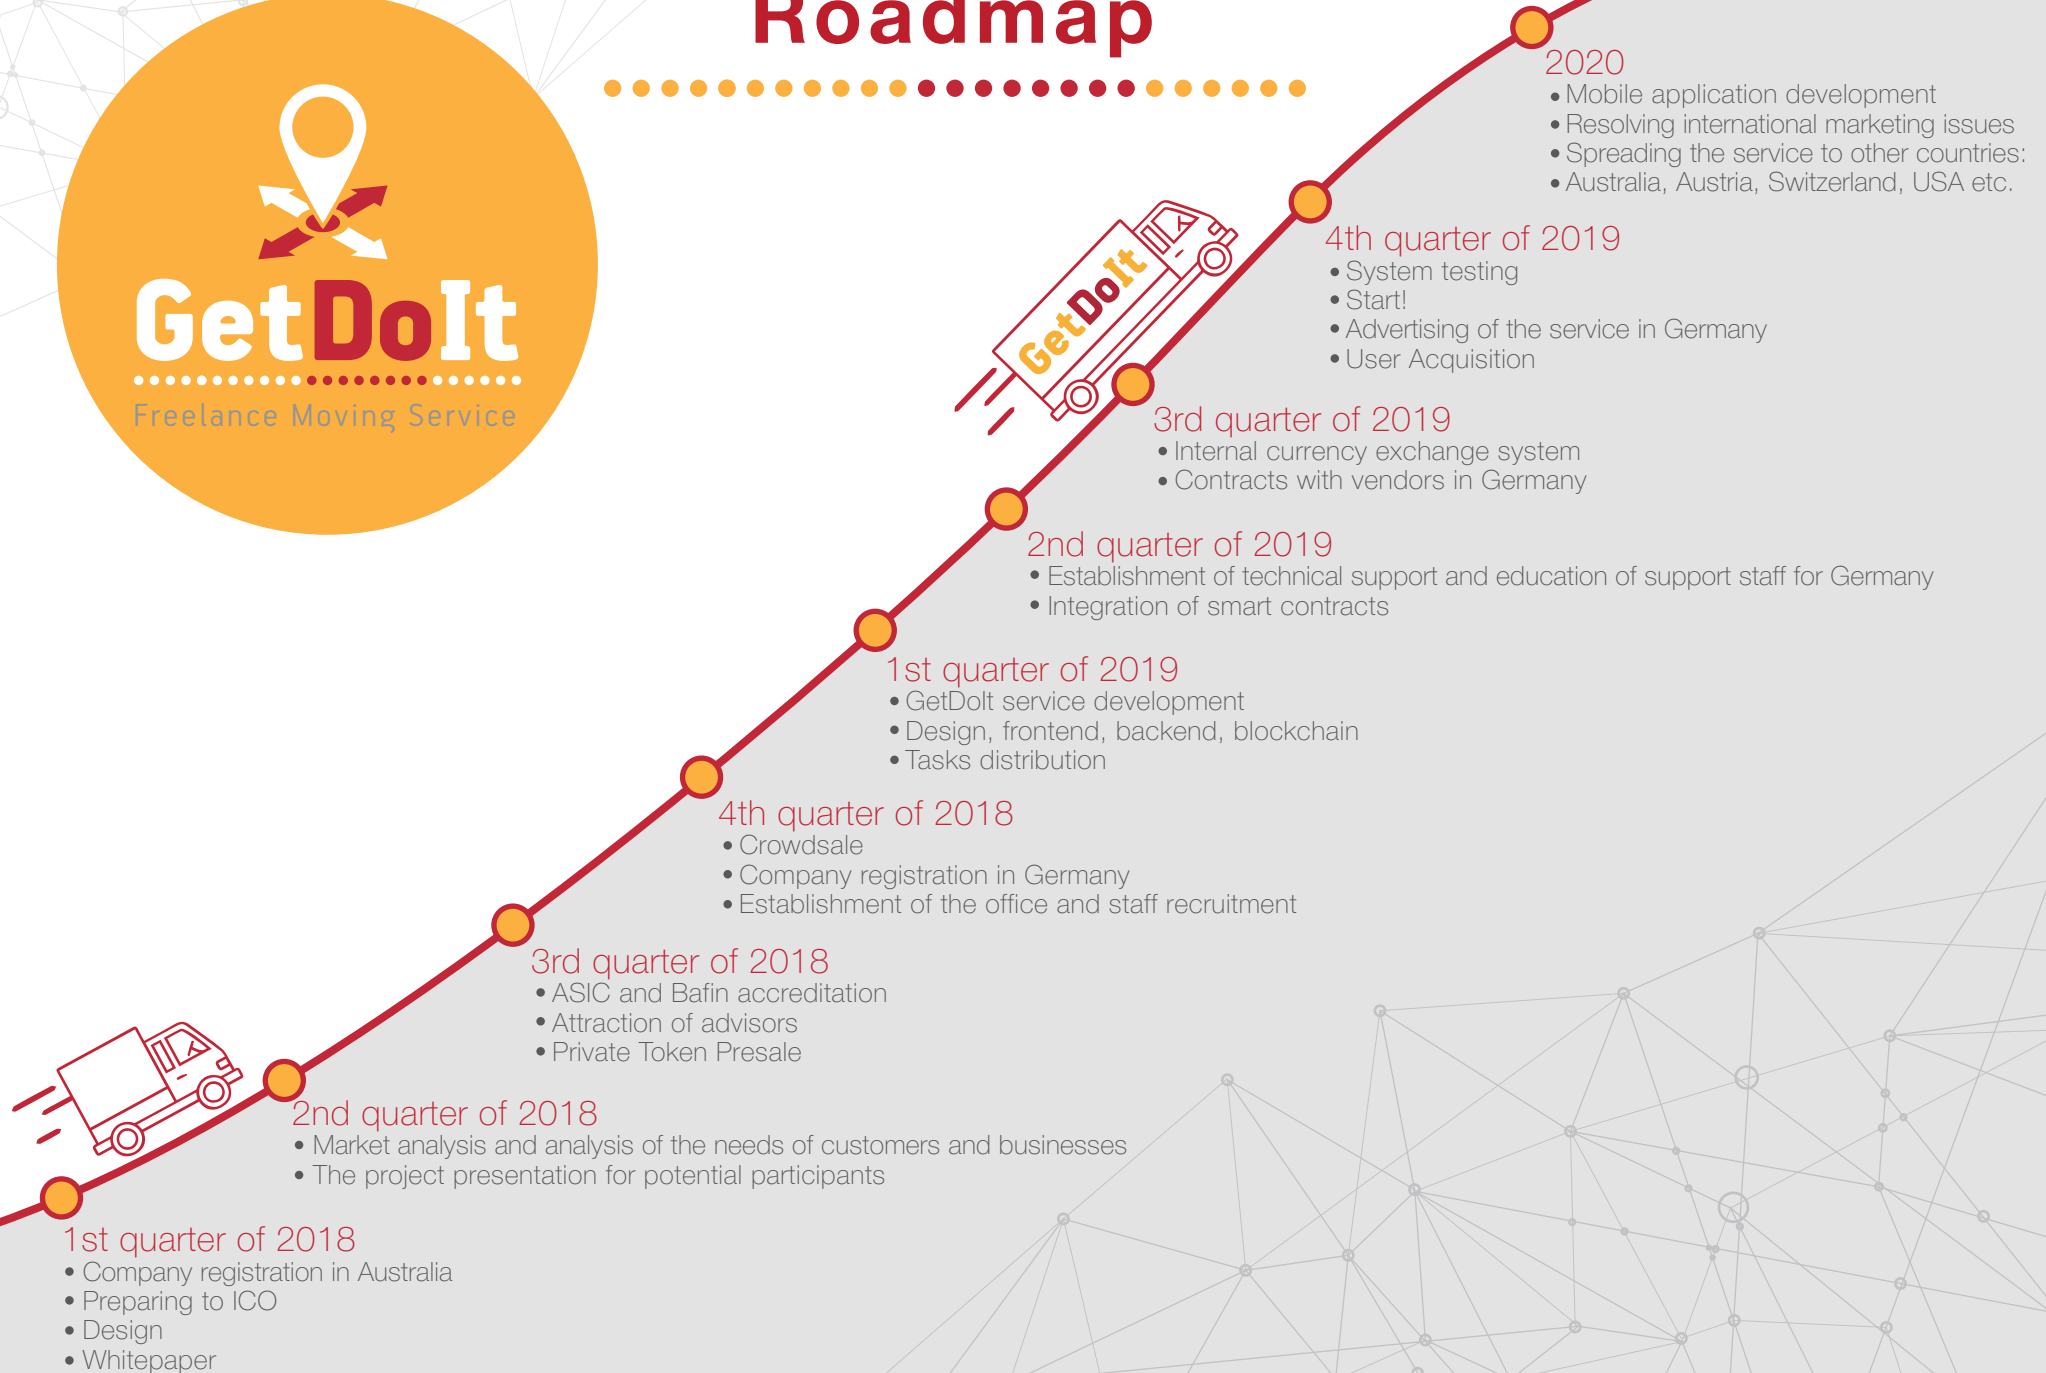

This amount of tokens will be used to cover the internal costs like software development and staff recruitment. The rest will be percentally distributed among the members of the Team.

## 10% of the tokens will be remain in a Reserve fund

The Reserve Fund will be used to provide rewards to new customers, accelerate the growth of the token ecosystem, and expand the company's operations.

# Roadmap

# Legal

GetDolt token will not be sold to citizens, residents, and entities of the United States of America, China, Singapore and any other country or jurisdiction in which an offer of cryptocurrency tokens is prohibited by law.

Promoting the crypto-tokens, GetDolt portal does not rely on the CSEF regulation RG261, and does not have any ASIC authorization to act as a crowdfunding intermediary platform.

We use the term «crypto-token», «token», and «coin» anywhere on this portal interchangeably to be construed to mean «utility token» that will be offered for sale.
